There are 4 templates, 40oz tumbler, 20oz tumbler and 4 inch square or round slate coaster.

Select the template.

The tumbler templates show a rectangle area to place your images in. Here we see the 40oz template:

The short edge here, will wrap around the the far short edge to make the circumference of the tumbler. This is also where the handle is located, so be aware when placing the designs.

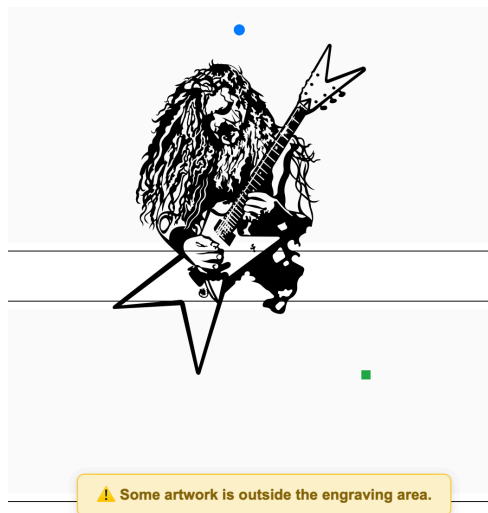

Only the 40oz tumbler has an upper and lower design due to a change in diameter.

Artwork

Expand the band your looking for, and the various images will be shown, drag an image into the canvas area where the template is.

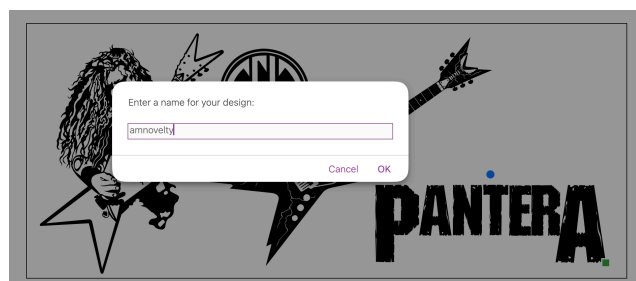

If the image is outside the template area, a warning will be displayed letting you know. Resize the item with the green square, or drag into the area.

The blue circle will allow you to rotate the design.

Items from any folder can be mixed and matched for any design you choose. If you decide you would like to remove an item, simply select the item by clicking on the item (you will see the blue circle and green square on the active item) then click Remove Selected (the red button)

When the design is completed, simply click the Upload button and provide your name in the pop up. You do not need to use your name, but it will help us :)

There are still a few bugs we are continuing to work out, try not to scroll on the canvas, move your cursor over the Artwork side bar, scroll up and down there, and the canvas will also scroll. Scroll on the canvas will cause your design to zoom in and out.

We will be adding the ability to write your own text and fonts in coming releases, as well as the ability to upload photos of your own to add to the slate coasters.
